MATTRESSES ARE
ALMOST 100% RECYCLABLE.

*So why are so many still
ending up in landfills?*

*Simmons®, the innovator in mattresses,
is also innovating the way the hospitality
industry disposes of old ones.*

Our new process handles everything from removal and recycling to new mattress installation. We will coordinate delivery as well as transportation of the old bed sets, including bed frames, to a designated recycling plant. Simmons® is the only manufacturer that offers this turnkey recycling service to all our hospitality clients nationwide.

Specially trained crews are strategically located across the country. There's one close to you right now, ready to get to work. Best of all, there's little to no disruption of your day-to-day operations. And because it's all behind the scenes, it's a nice addition to the sustainability message you might choose to share with your guests and the community.

Once the job is completed, Simmons® will provide you with a certificate of recycling.

Zero-waste from the start

Simmons® sustainability efforts begin at the factory with our zero-waste policy. Over the past two years, Simmons® has reduced scrap production by 40%. Since 2007, we have recycled more than 23 million pounds of materials that otherwise would have ended up in landfills.

Energy-efficient plants

We have installed the latest high-efficiency lighting and equipment in many of our plants, reducing energy use by almost 40%. Plus, each Simmons® plant is strategically located to help minimize the use of fuel and energy during the delivery process.

Since 2007, we have recycled more than **23 million pounds of materials.**

Environmentally responsible products

100% of Simmons® Pocketed Coil® springs contain recycled steel. Many fabrics are derived from cultivated wood fibers to be partially sustainable. These fabrics also meet Oeko-Tex 100 standards, which are internationally recognized safety standards for harmful substances. In addition, the wood used in our EndurTECH™ foundation has a 20-year warranty for the durability and reliability you've come to expect from Simmons®.

Of course, sustainability is important. But the critical part of the equation begins long before you are ready for recycling. It starts with incredibly comfortable mattresses that will leave your guests feeling great about their stay. And it continues with a quality and durability that ensures you won't be replacing your mattresses for years to come.

EverNU® NANOTEX®

The freshest thinking in hotel bedding yet

These removable and replaceable quilted mattress tops are another sustainable innovation from Simmons® Hospitality. Rather than replace an entire mattress, simply unzip the soiled cover and rezip the new one. It's a green initiative that's also a great money saver. As an added layer of protection, Beautyrest® mattresses also feature an exclusive Nano-Tex™ stain-resistance treatment embedded into the fabric.
